

Armour Wire Anchor Clamp (AWAC)_Oval

Armour Wire Anchor Clamp (AWAC), also known as Armor Clamp

The AWAC is used to anchor an armoured cable to a structure such as manhole wall or concrete abutment. The armour wires are peeled back and clamped between the base plate and the ring to ensure that the cable does not slip away during its service life.

Specifications

Material	G316 Stainless Steel
Oval Plate	290mm x 160mm x16mm thickness. Internal hole 60mm Diameter. Fasteners 2 x M12x100mm dynabolts.
Disc	158mm Outside Diameter x 12mm thickness. Internal Hole 80mm Diameter. Fasteners: 6 x M12x90mm countersank bolts.
Weight	5.4kg
